<b>COMPUTER MUSEUM OF AMERICA</b>	CMoA's MISSION is to preserve examples of the computing artifacts that contributed to the digital revolution, to catalog these historically important artifacts, and record their surrounding history. OUR GOAL is to ensure these assets are available for study, for exhibition, for education, and to encourage economic and vocational empowerment.	WE BELIEVE: Computing history is worthy of preservation and study in its own right. Our core conviction is that the history of computing contains many revelations about human innovation and creative problem solving. We especially embrace making technology careers accessible to everyone, including underserved populations.
<b>LOVE BYTES THE EVENT</b>	CMoA is a 501(c)3 and proceeds from Love Bytes will go towards the annual fund which is essential to funding educational programs like field trips and	STEM camps, preservation of artifacts, creation of new exhibits, and community outreach.
<b>LOVE BYTES THE EXHIBIT</b>	Love Bytes is a new exhibit, unveiling for the first time for attendees of the Love Bytes brunch. It takes a humorous and thought provoking look at	how technology has changed the age-old activities of flirting, courting, and matchmaking. Has tech made it easier to find the love of your life? Come and see!
<b>SEND YOUR LOVE CONTACT</b>	If you are unable to attend the Love Bytes event but would still like to support the Museum's mission, please visit <a href="http://computermuseumofamerica.org">computermuseumofamerica.org</a>	If you have questions or would like to participate in Love Bytes, please contact <a href="mailto:ryoungblood@thecmoa.org">ryoungblood@thecmoa.org</a>
